Be HairFree'

Earlier this week I received a package from a hair brush company, hairfree'. Because I love to receive gifts, I was very excited about trying out the product. I love the look of the round brush but wasn't sure at first glance what was special about it. The brush has ceramic coated plates which help to produce a sleek straight hairstyle very similar to what I would achieve if I flat ironed my hair.

What I loved about this actual brush is that you can adjust the knob to convert it into a vent brush which helps to speed up the drying process when blow drying your hair. Because I have a lot of hair I didn't have to take a long time to blow my hair straight. The brush did it for me, and I was also able to get large curls with lots of body. Another great feature on this brush is the self cleaning. This feature is perfect for hair stylists who fight with hygiene of keeping their brushes clean. Now hair stylists will always be able to use a clean brush at the salon, on set, anywhere they are working. Personally, having a hairfree' brush in my kit will be much easier for me when I am working with my celebrity clients. I don't have to worry about bringing a full hair kit with me because the brush is so versatile that I can do a fast blow out, straighten the hair, style the hair and then cleaning the brush is very easy. After removing the hair you can wash the brush stand it up on its end and let dry at night and the hairfree' brush won't rust. The round brush is 10" in length the brush head is 4.0" and it weighs about 4.99 ounces. It also comes in a flat brush. A must have item for any hairstylists.
